

Memorandum

To: Technical Panel
From: Darren Byers
Date: June 23, 2020
Re: MR-00444: Reliability-Related Information

At the May 26 Technical Panel meeting, the Technical Panel voted to post the proposed market rule amendment for stakeholder comment. The proposed market rule amendment was posted on the Proposed Market Rule Amendments [webpage](#) for two weeks and no stakeholder feedback was received during this period.

Background

The IESO is proposing to amend the market rules to remove appendices 4.5A to 4.9 in Chapter 4. Since these tables were drafted market participants are now required to submit this information through Online IESO, so they are no longer needed. As a defined term, *reliability-related information*, includes these appendices in its definition, it will need to be changed along with references to the appendices that will be removed. Additional changes, will also be made to Chapter 5 to provide consistency between the market rules and Market Manual 11, part 11.3: Reliability Information Catalogue, to reflect the removal of these appendices. These changes are not material as no market participant obligations are impacted.

Recommendation

The IESO recommends that the Technical Panel vote to recommend MR-00444-R00 to the IESO Board for consideration at its August 25, 2020 meeting.

The IESO is proposing that this market rule amendment have an effective date of September 21, 2020.
