Re: CMSC Recovery from Dispatchable Loads

At the January 19, 2021 Technical Panel meeting, the Technical Panel voted to post the proposed market rules amendments for additional stakeholder review and comment. The proposed market rule amendments were posted on the [Proposed Market Rule Amendments](#) webpage for two weeks; no stakeholder feedback was received during this period.

Feedback from the Technical Panel during the January 19 meeting led to two minor changes to the amendment proposal. The word “endangering” was removed from the background section of the proposal document as it was not required and a missing semi-colon was added to new section 3.5.6G of Chapter 7. There have been no other changes to the amendment proposal since the Technical Panel’s last review.

Background

IESO presented its proposal to stakeholders at an October 27, 2020 public information session and requested feedback on the proposed amendments. The IESO did not receive any written feedback following the public information session. All information related to this engagement activity can be found at the following webpage – [IESO Public Information Sessions](#).

Recommendation

The IESO recommends that the Technical Panel vote to recommend MR-00447-R00 to the IESO Board for consideration at its March 10, 2021 meeting.

The IESO is proposing that this market rule amendment have an effective date of April 6, 2021.
