

Assessment of Impact of Market Rule Amendment on Consumers Re: Price, Reliability, Quality of Electricity Service

This form is used to document the *IESO's* assessment of the impact of a proposed *market rule amendment* on the interests of consumers with respect to prices and the *reliability* and quality of electricity service.

Terms and acronyms used in this Form that are italicized have the meanings ascribed thereto in Chapter 11 of the *Market Rules*.

Part 1 – Market Rule Information

Identification No.: MR-00479-R00

Title: Transmission Rights Market Enhancement and Platform Refresh

Date of Assessment: February 12, 2024

Part 2 – Assessment

The following is the *IESO's* assessment of the impact of the proposed *market rule amendment* on the interests of consumers with respect to price and the *reliability* and quality of electricity service.

Impact of Price:

None

Impact on Reliability of Electricity Service:

These changes can promote greater participation and potentially greater liquidity in the *TR market*, which could also promote more *intertie* trading. Furthermore, it can result in greater participation from energy traders and greater energy trading across jurisdictions, which could have a positive impact on reliability as energy traders would be able to hedge the risk of intertie transactions.

Impact on Quality of Electricity Service:

None
